Storms

Weather changes a lot, sometimes it is sunny, sometimes it rains and sometimes it is windy

If it is a windy day that is OK. Wind is just air moving around. If I hear it or see it blowing it is fine, it will stop soon.

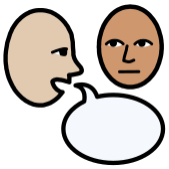

Sometimes it is only a little bit windy but sometimes it can be very windy

During a storm some people get scared because it can be very noisy and the wind can be really strong

Luckily storms that strong don't happen very often and the adults with me know how to keep me safe.

If I feel scared about the weather I can talk to adults about it, they can help me to be calm
