

Dear Parents / Carers,

We can't believe your children are already over halfway through Year2! Here is some of the learning that they will be taking part in, over the next half term.

English

This half term, we are focusing our writing skills on the text 'Goldilocks' by Lauren Child. The children will be reading and writing about the text. The written outcome at the end of the unit will be a poem about themselves using apostrophes for contracted forms and co-ordination (using or, and, but).

Reading Challenge

Well done to all of the children who took part in our school reading challenge! It was a great success!

It is important to read at home each night. Please ensure your child brings in their plastic reading folder every day so that they can change their books in their reading group.

Mathematics

This half term, the children will be focusing on 3D shapes, Fractions and revisiting Addition and Subtraction. At home, ask your children about their learning and encourage your child to practice the skills they have learnt in class.

Science

The children are going to focus their learning on **Plants**. They will learn about plants and the best conditions for growing them. They will also be growing their own plants in school.

PE

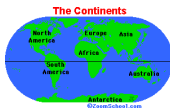

PE will take place for **2OD** on a **Tuesday** with Miss O'Donoghue and on a **Friday** with Mrs. Boyle. PE will take place for **2MB** on a **Thursday** and on a **Friday** with Mrs. Boyle. The lessons will focus on Athletics this half term.

Computing

Pictograms—The children will begin to understand the importance of organising data effectively for counting and comparing. They will create their own tally charts to organise data and represent the tally count as a total. They will become familiar with the term 'pictogram'. They will create pictograms manually and then progress to creating them using a computer. They will be logging on to a computer using their username and password.

Geography

In Geography, the children will be learning about Continents and oceans; hills, streams and reservoirs. They will be given opportunities to have a better understanding of uplands and lowlands ('hills and lower places') as they apply to Jersey.

In JIGSAW the children will discuss what their bodies need to be healthy. They will learn what relaxed means and know some things that make them feel relaxed and some things that may make them feel stressed. They will learn how medicines work in their body and how important it is to use them safely. They will sort foods into the correct food groups and know which foods their body needs every day to keep them healthy. They will learn which foods to eat to give their bodies energy.

Art

Printed Images- The children will continue to create their own collagraph printing plate and use it to print on to a range of papers. They will continue to build examples of their learning in their sketchbooks, recording observations, revisiting their ideas and evaluating their own and others' artwork.

Music

Mrs Le Brun will be focusing on teaching the children using **Keyboards**. Both classes have music lessons on **Fridays**.

Homework

Homework is set every **Monday** and collected in on a **Monday**. Please remember to also include at least **15 minutes** of reading each night.

If you have any questions or concerns, please do not hesitate to ask one of us at drop off or pick up or email. u.odonoghue@samares.sch.je f.brandon@samares.sch.je h.manning@samares.sch.je

Diary Dates

End of Term- Friday 4th April

Kind regards,

Miss O'Donoghue, Mrs. Manning and Mrs Brandon
